

Intellicomfort **CH150TS** is the new one born in the family Fantini Cosmi.

It has all the functions of **the cronotermostato** CH150 but the illuminated back replaces to frontal keyboard an innovative one display touch screen, than it confers an aesthetic more modern and technological anchor.

Sufficient to press on the icone of the display in order to set up the wished program and to activate the blue retroilluminazione.

But like making in order to clean up the display without to modify the set up program?

Enough a short pressure of the key estate/inverno and becomes part the block function keyboard.

Like its standard-bearer CH150, also Intellicomfort CH150TS is predisposed for the connection to telephone activators CT3 and CT4 for the management at a distance of the system and to a probe of separate temperature in order to visualize the external temperature, or for regulating the temperature of a various room from that one in which the cronotermostato one is installed, or in order to control the limit of the temperature of the pavement.

Moreover it can regulate the temperature in traditional way or proporziona them; it calculates the time of pre-ignition of the system; it finds the relative humidity rate visualizing the perceived temperature.
