

Programmable Timer Switch - Weekly (Resistive Load)

Don't you want to come to frozen house? Don't you want to miss your favourite TV program? Do you fear of thieves? This timer switch can in your absence repeatedly switch on and off for example heating, lamp, radio etc. Timer switches program up to 6-on and 6-off switchings per day - 63 times per week.

Set program can be repeated every day or given day of the week. Mode count-down, accidental switching to confuse thieves during vacation, change summer-winter time, LCS display, automatic or manual mode.

Design suitable to switch resistive load up to 3680W (16A/230V) not via relay either clamper. Not suitable for inductive load.
