

Weekly Programmable Thermostat - Euro 99 - ECO2

New generation of popular weekly programmable thermostats EURO 093. Programs and its setting is the same as by old EURO 093, above that new generation has these advantages:

- much smaller size (74x74x28mm)
- larger extent of measuring temperature 0 - 40 grades C
- larger extent of temperature regulation 5 - 35 grades C
- independent programming for Saturday and Sunday.
- incomparably lower price

This thermostat is powered by enclosed two alkaline batteries (AAA). Programming of temperature modes individually for each day of the week (7 days), 8 programs (4 programs for weekdays, 2 programs for Saturday and 2 programs for Sunday). Manual or automatic temperature control. Display of temperature, time and operation state (on/off).
